

CD-030 Drawer Refrigerator

Smart Cooling for Confined Spaces

CD-030 drawer refrigerator shown

This compact refrigerator turns any unused nook into a practical 31 quart (29 liter) cooler. The CD-030 permanently installs in any cupboard space. A convenient variable thermostat protects your contents from freezing, and the Danfoss compressor is extremely energy efficient.

For installation flexibility, the compressor can be mounted on the unit's rear, left or right side, or up to 5 ft. (1.5 m) away. The CD-030 drawer refrigerator provides a very energy efficient, flexible solution for boats with limited space.

Key Benefits

- Permanent installation in cupboard space or under a settee.
- Easy pull drawer on ball-bearing slides.
- Continually variable thermostat prevents contents from freezing.
- Sturdy metal housing.
- Extremely energy efficient.
- Injection molded parts.
- Environmentally safe R-134A refrigerant.
- CFC-free polyurethane insulation.
- Available in black or white.
- Danfoss BD35F compressor can be mounted on the unit's rear, left or right side, or up to 5 ft. (1.5 m) away.

The CD-030 converts empty niches in the galley or under a settee into a 30-liter capacity refrigerator.
